

CHALLENGER

MAZDA Model: IDXR2920 HIGHBAY LIGHT

Challenger LED High Bay represents a superior light source characterized by high quality. It incorporates multiple high-power LEDs, and its innovative design eliminates the need for an additional reflector, thus preventing common issues like deformation during transportation, often seen in traditional LED high bay lights.

Notably, this product is available with a motion sensor, a remarkable feature attributed to its unique heat dissipation system embedded within the Cast Alloy casing design. Backed by the reliability of high-quality Philips LEDs, it stands as a leading contender in the market. The lighting it provides ensures comfortable visibility, boasting a high Color Rendering Index (CRI) that accurately represents the true colors of objects. Additionally, the option to choose different light colors accommodates various environmental needs while avoiding discomfort or disruption of vision.

These high bay lights adhere to all UK safety regulations, including CE, RoHS, and UKCA certifications.
